

LIMS UX Project Brief

Project Overview:

Using the latest research on LIMS best practices, this project aims to redesign the user-facing experience within Wasatch BioLabs' LIMS to make user account creation, ordering, order tracking, and report access processes as seamless as possible. The goal is to improve both prospects' and clients' interactions by minimizing friction and enhancing satisfaction throughout their LIMS journey.

Objectives:

- Research LIMS Best practices
- Simplify account creation for prospects (Account set-up & User management)
- Streamline the ordering flow / sample submission flows
- Enhance order-tracking processes
- Ensure easy and intuitive access to reports and results
- Enhance overall user satisfaction by reducing steps and improving navigation

Scope of Work:

- **LIMS Research/Best Practices:** Gather insight into other LIMS and industry standard for LIMS UX
- **Wireframes & Prototypes:** Create initial wireframes for account creation, ordering, tracking, and report access.
- **Usability Testing:** Conduct tests to identify any barriers or friction points.
- **UX Design:** Develop final designs that align with a frictionless, efficient user journey.

Deliverables:

- Research insights
- Journey maps
- Low- and high-fidelity wireframes for key user interactions
- Clickable prototype for testing flows (account creation, ordering, order tracking, report access)
- Final UX designs with annotations

Timeline:

- Industry Research: ...Designer estimate
- Wireframes & Prototype: ...Designer estimate
- Usability Testing: ...Designer estimate
- Final UX Design Delivery: ...Designer estimate

Tools/Platforms:

- Figma for design
- Slack/Email for communication
- Google Drive for file sharing (if needed)

Key Contacts:

- Chase Christensen – Project Lead | [chase@wasatchbiolabs.com]

Success Criteria:

- Reduced account creation complexity
- Streamlined ordering process
- User friendly platform flow and intuitive design for non-technical users

User Personas:

1. University Researcher
2. Clinical Trial site manager
3. Physician admin
